EXPERIENCE

UI/UX Engineer (Software Developer)

Reliance Jio

Oct 2023 – Ongoing

Navi Mumbai

- Product Redesign & UX Strategy:** Overhauled full-scale enterprise web applications to meet modern design standards, boosting usability and accessibility (WCAG) scores by 25%.
- UX Research & Architecture:** Architected wireframes, user journeys, and site maps for major core applications, including NETSTAT, NETFLOW, and NETSIM.
- Frontend Execution:** Coded responsive, fluid web interfaces using HTML5, CSS3, and JavaScript, contributing to a 15% lift in cross-platform user engagement.
- Interactive 3D Design:** Utilized Blender to model custom 3D assets and assets for proof-of-concept web interactions, blending spatial design with standard web layouts.
- Agile Project Delivery:** Owned end-to-end interface delivery for NETFLOW using Kanban; collaborated with backend teams to map API integrations to UI states.
- Component & Design Systems:** Built reusable UI component libraries to bridge Figma-to-code workflows, cutting development time and ensuring design consistency.

PROJECTS

MSRTC Mobile App Redesign (In Progress) | UX Design & Prototyping

- Solved a critical "No Bus Found" booking drop-off loop by re-engineering rigid terminal-to-terminal query logic.
- Built dynamic Figma prototypes utilizing advanced variables and conditional logic to mimic live app data.

Commercial Co-Living (PG) Platform | Freelance No-Code UI/UX Engineer

- Designed and launched a fully responsive marketing and visit booking website for a PG business using Framer.
- Structured clean layout hierarchies, simple CMS and interactive components to maximize room inquiries and conversion rates.

AI Healthcare Analytics Application | Frontend UI & Interaction Lead (Final Year Project)

- Designed a stress-free frontend interface translating complex ML health data into readable user dashboards.
- Implemented conditional UX logic paths to seamlessly route users to critical care or over-the-counter recovery.

SUMMARY

"Google UX Certified UI/UX Engineer with 3 years of enterprise experience at Jio bridging design and frontend execution. Proficient in Figma prototyping, scalable component architecture, and production frontend development. Combines a user-centric design foundation with a specialized creative self-taught tech stack (Blender, React Three Fiber, GSAP) to engineer high-performance, immersive 3D interfaces and intuitive digital products."

SKILLS

- Design & UX:** Figma (Advanced), Wireframing, User Journey Mapping, Information Architecture, Design Systems, Accessibility (WCAG).
- Frontend Engineering:** HTML5, CSS3, JavaScript (ES6+), ReactJS, Tailwind CSS, Component Architecture.
- Creative Tech & 3D:** Blender (3D Modeling), React Three Fiber (R3F), React Three Drei, GSAP (GreenSock).
- Developer Tools:** Git, VSCode.
- Soft Skills:** Problem solving, Teamwork, Code review, Debugging.

EDUCATION

Bachelor of Engineering (Electronics and Telecommunication)

D Y Patil College Of Engineering, Pune

Aug 2019 – June 2023

8.26 CGPA

CERTIFICATIONS

- Google UiUx Professional Certificate
- Adobe UX Design Foundation
